Customer solutions

UK RSP Trading

- Unlock complete access to the United Kingdom Retail-Service Provider (RSP) Network through Infront Professional Terminal's extensive data and analytics suite
- The Infront RSP Hub manages an annual volume exceeding £50 billion in both buy- and sell-side transactions.
- Automate workflows and have multiple order sources interact with the RSP Network

Institutional execution

- Combine state-of-the-art data & analytics with high-end professional order & trading workflows
- Provide your clients with direct market access or execute on their behalf
- Enable seamless interaction with your Internal Order Management system or enhance scalability with Infront Order Management Services

Investor solutions

- Develop or utilize ready-made web and mobile end-client tools to scale your retail solutions
- Expand reach into new segments through a technology stack trusted by millions of users.
- Oversee and manage risks associated with end-client trading activities, including exposure management and trading power
- Adhere to MiFID II suitability standards

Solutions highlights

- Cost effective & full access to the UK RSP Network
- Intuitive and comprehensive combination of RSP trading with advanced data & analytics in IPT
- Drop copy connectivity for STP processing of orders & trades
- Quote & execution analytics
- Combine the advanced and extensive data & analytics offering inside of the IPT with its institutional order handling capabilities
- Multi-broker connectivity (in & outbound)
- On behalf of end-client execution
- Integration of 3rd party broker algos
- Web & Mobile based end-user solutions offering easy but advanced data & analytics tools
- Support upload of client portfolios & accounts
- Retail trading risk checks
- MiFID II end user suitability checks
